Care and Maintenance Guide

Gliderobes furniture has been specifically designed and manufactured for general bedroom use. We offer a 10-year guarantee on the vast majority of our products. To keep your furniture in tip top condition we recommend you follow our instructions.

DO:

All surfaces should be regularly dusted with a soft cotton cloth or micro-fibre cloth.

Occasionally wipe over the whole area of your furniture with a soft dampened micro-fibre cloth and dry immediately.

If the surface or frames become particularly dirty or for stubborn marks use ONLY warm water and a small amount of washing up liquid or mild detergent.

Be careful not to allow water to run down the product in any way. Surfaces should be thoroughly dried with a lint free or micro-fibre cloth to prevent watermarks.

Keep the bottom track clear. Excessive dust, debris and pet hair can result in the doors sticking. Vacuum clean the bottom tracks regularly.

Spills should be removed immediately using a clean cloth.

Do take care not to overfill your wardrobe, never allow stored items to apply excessive force on the wardrobe doors.

DO NOT:

We do not recommend using any type of cleaning agents as they are liable to scratch the surface or film to the frames. You may be tempted to use glass cleaners (used on regular windows) but we do not recommend you do this.

Never use abrasive cleaning products or cloths, rags, sponges, paper towels or scouring pads when cleaning your wardrobe components or surfaces.

Under no circumstance should solvent cleaning agents be used (such as phosphoric or hydrochloric acid-based cleaners, nitro-based thinners, acetone or nail polish)

Do not use sharp objects to remove paint splashes etc.

Do not use white vinegar or other related products as they maybe too strong and leave streak marks that may not be removable. This may cause long term damage to glass or mirrors.

In the unfortunate event of you having to report a problem where a representative is required to visit and investigate; please be advised if the product is not found to be faulty and the problem is a result of mis-use a call-out charge of £85 will be made.
